LAMB TELECOM

HOW A RANSOMWARE ATTACK SHUTS DOWN YOUR MISSION

PHISHING ATTACH HITS
Someone clicks a bad link or downloads a fake file

SYSTEM BREACH
Malware installs silently and finds weak spots.

FILE ENCRYPTION STARTS
Important data — donor info, event plans, financials — gets locked.

NETWORK SPREAD
The ransomware moves across systems, locking more files and devices.

RANSOM DEMAND ISSUED
Attackers demand big money — and there's no guarantee they'll unlock it.

OPERATIONS FREEZE
Staff lose access to essential systems. Programs stall. Donor trust takes a hit.

Stop Ransomware Before It Shuts You Down

Lamb Telecom helps nonprofits lock down their data, secure their networks, and stay mission-ready.

QUICH FACT
Ransomware demands are bigger than ever: In 2024, the median ransom hit **$1.5 million.**
